WARNING: All plumbing installations must be done in accordance to legal regulations.

1. Read the complete instruction manual before beginning installation.
2. Confirm that your model will fit in intended location and plumbing fixtures are located where legally required before beginning installation.
3. Not all drawings on this manual are drawn to scale. Please refer to the model chart.
4. Walls and sub-floor must be solid, and square.
5. Always use drop cloth to protect bathtub from damage during installation.
6. **Two people must be used at all times to move and install bathtub.**

ATTENTION! Before installing the bathtub:

- Make sure all wood studs and supports are properly installed.
- Verify all the necessary plumbing is installed by a certified plumber.
- Floor drain and trap are not included. Make sure to install according to local and legal regulations.

Roughing-in

- Rough plumbing must be pre-installed by a certified plumber before Alcove Bathtub installation.
- If floor drain-hole installation is needed, contact a certified plumber.
- Place tub at final desired location and verify floor drain and bathtub drain align.

Attaching cast iron bars

ATTENTION! Assemble bathtub on drop cloth or rug to protect its surface.

1. Flip tub on upside-down using a drop cloth for protection.
2. Slide hook end of iron cast bar into position as seen in picture.
3. Use level tool to verify apron is vertical to the ground.
4. Screw cast iron bar (flat end) into raised wood platform on bottom of tub.
5. Repeat for all three supports.

Leveling Bathtub

1. Flip tub back to standing position.
2. Adjust the leg height to ensure tub is level with floor and apron, verify tub is level using level tool.

Setting the Bathtub

1. Set down bathtub back in the predetermined location.
2. Use level tool to verify tub is flush with floor for maximum stability.
3. Apply bead of silicone sealant where the apron and floor meet to create a water tight seal.
